Application Configuration

Student Name: _____Arin Tang_____

Date: _____11/7/26_____

Instructions

Modify and document settings within the applications you installed. For each installed application, configure at least one non-default setting and document the change. Explain what was modified, why the configuration was selected.

7-ZIP

I decided to modify the Cascaded content menu. I enabled this setting to help reduce clutter.

Notepad++

I enabled Reduce within Notepad++. I chose this setting so the tabs would shrink immediately, giving me more room on the screen.

Google Chrome

Under On startup in Google Chrome, I enabled "Continue where you left off". I chose this setting so that whenever I reopen Chrome, I can continue where I left off.
